PRYDA FRAME FIX

Pryda Frame Fix is suitable for Residential light timber frame dwellings designed where the maximum loaded dimension of the wall for the respective top plate does not exceed that specified in NZS3604, Table 8.16 – Top plates of loadbearing walls.

Re: Use of Pryda Frame Fix for the allowance of holes in common studs and top plates

I, Kristopher Orlowski, being a Chartered Professional Engineer, hereby certify the NZ Pryda Frame Fix as an alternative solution to NZS3604 to Section 8, Clause 8.7.5 Holes in plates when used and installed in full accordance with the NZ Pryda Product Data Sheet.

The use of the NZ Pryda Frame Fix extends to include the reinforcement of common studs in both external and internal walls; For which I hereby certify given the use meets the scope and installation requirements as outlined in the NZ Pryda Product Data Sheet.
